SUMMARY

I am an experienced and self-taught Android Developer with over 2 years of professional expertise in developing new business logic features using Java and Kotlin with Android Studio. I am proficient in implementing best practices such as the MVVM design pattern, adaptive layouts with XML and Jetpack Compose, asynchronous operations, and local data storage. I am deeply passionate about staying attuned to the latest trends in Android development to deliver high-quality mobile solutions.

WORK EXPERIENCE

Digital Geko — Android Developer

October 2021 - March 2024

- Developing new business features for a baking app by using Java, Android Studio and applying the MVVM pattern.
- Implementing web services with Retrofit.
- Navigation with args with navigation component.
- Implementing SDKs.
- Designing UI views with XML and viewBinding

TRAINING

Digital Geko — "Geko Dojo" Training Program

May 2021 - August 2021

Training for developing mobile apps accompanied by a skilled instructor through the following Udemy courses:

- Java Programming Masterclass for Software Developers.
- Android Java Masterclass - Become an App Developer.
- The Complete Android 10 & Kotlin Development Masterclass.
